

WELCOME TO BELARUS!

NATIONAL LIBRARY

Excursions to the National Library of Belarus

"Minsk is in full view" thematic tour with a visit to observatory and ability to take digital photo as well as to shoot a video (the duration of tour is 1 hour) is offered for our guests. The excursion includes short familiarity with the library (without visiting the art gallery and the book museum), and also the going up to the observatory where visitors will be able to admire the view of Minsk from the height of more than 73 meters.

Sightseeing tour with a visit to the book museum of 60 minutes duration

The excursion route passes through three floors of the building. During the excursion you can discover the history, information resources, equipment, service technology, architectural features and decoration of the National Library, as well as its functions as informational, social and cultural center.

Observatory

Indoor and outdoor observation decks are located in the top part of the National Library high-rise depository (back of the building entrance).

In order to get to the observation decks, visitors take the panoramic elevator, which has a transparent prismatic glass wall that allows them to get a sense of flight.

Visitors are offered a unique service on the use of "Binocular of panoramic view" optical device. Binocular DigiFox DFC 30 × 80 with a zoom factor in 30 times has high resolution and wide angle of view that allow to obtain high quality images of remote objects from a great height of the view.
