

COVID-19 testing is launched at Minsk National Airport

At the moment a procedure by ELISA (enzyme-linked immunosorbent assay) is available. The testing point is located in the departure area, sectors 5-6 (before pre-flight procedures).

Anyone can be tested for coronavirus infection: arriving and departing passengers, aviation personnel, visitors and employees of the airport and other organizations.

Working hours of the laboratory is from 9.00 to 18.00 Monday-Friday. Later a round-the-clock mode is possible.

To conduct a test you must have:

- passport;
- a document confirming payment.

The analysis is performed by donating blood from a vein. Immunoglobulins M and G are determined for coronavirus infection.

The sampling of biomaterial and its processing is carried out by qualified medical staff of the laboratory service of Minsk City Center for Hygiene and Epidemiology.

IMPORTANT! It is necessary to diagnose COVID-19 on an empty stomach or not earlier than 3-4 hours after eating.

Issuance of research results is carried out within 1-1.5 hours.

The result is handed out upon provision of a passport or by e-mail in Russian and English languages.

The cost of the service is 62, 92 BYN.

You can pay at a bank, as well as through an ATM, self-service terminal and mobile banking.

Details for payment through the bank:
